

TimeCom® for Oracle

TimeCom® for Oracle HCM Cloud Time and Labor is a powerful cloud-based time tracking and collection solution that integrates seamlessly with the Oracle Cloud Time and Labor application.

TimeCom offers a complete cloud solution – the highest quality time clocks, embedded time clock software, and monitoring tools. The intelligent time clocks store employee time data and transactions through a redundant system that ensures data accuracy – even if there's a network interruption.

The entire solution gives you a best-in-class method for automating the efficient collection of time and attendance data from your employees. TimeCom helps you optimize your Oracle Cloud Time and Labor application investment.

Benefits of TimeCom®

- Up and running quickly, ready to collect data right out of the box.
- Seamless integration sends time collection data directly back to Oracle.
- Constant monitoring – Rapid alerts and responses avoid potential issues.
- Proven Terminals – Purpose-built for Oracle HCM Cloud Time and Labor.
- State-of-the-art biometric technology or proximity card or PIN only.
- Customizable integration.
- Easy to use interface.
- Data throttling to manage efficient data transmission.
- Localization, time zone, and language management.
- Greater visibility into health and communication status through Timecom Monitor.
- Data analytics, trending, and reporting available.

How It Works

Your Oracle Time and Labor integration with TimeCom is managed and hosted in the Cloud, so your internal resources are free to focus on other projects. The ATS team ties the whole system with its communications software that allows your time and attendance terminals to communicate seamlessly with your application, resulting in an efficient and compelling solution.
